SYSTEM OF GROUND MOUNTING OF PHOTOVOLTAIC MODULES (BIDIRECTIONAL)

Such a system consists of a certain list of elements that are easy to install. The design of this system is designed to minimize the amount of labor and time spent on installation work. Such a design solution makes it possible to make maximum use of the available space and start the generation of photovoltaic modules from scratch in the shortest possible time.

Aluminum clamp (T/Z-shaped)

Pipe made of galvanized metal.

Hardware (bolts, nuts, washers)

Galvanized steel profile (C-shaped 5x10x76x41x76x10x5)

Does not consume concreting or other preparatory work.

Semi-arch - structural element of galvanized metal.
